

Industrial Internship Summer-05 Orientation

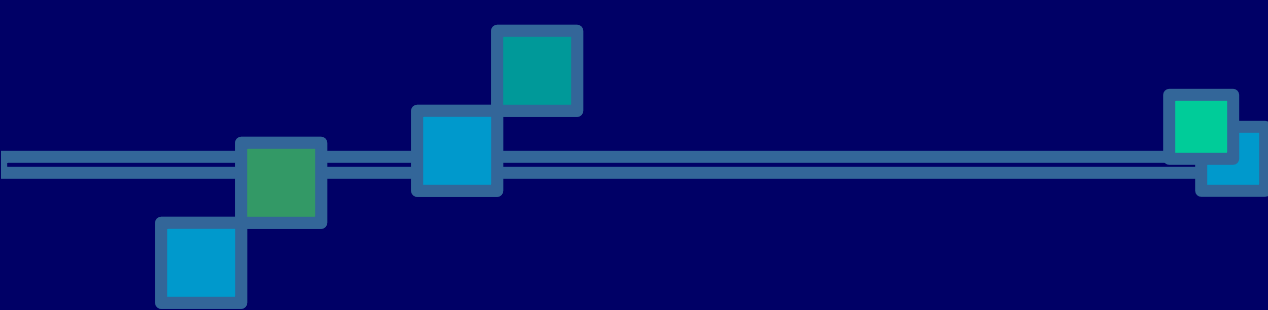

Ashish N Jadhav

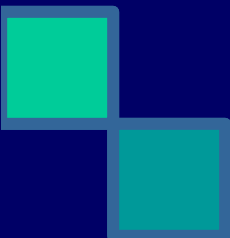

Vision Statement

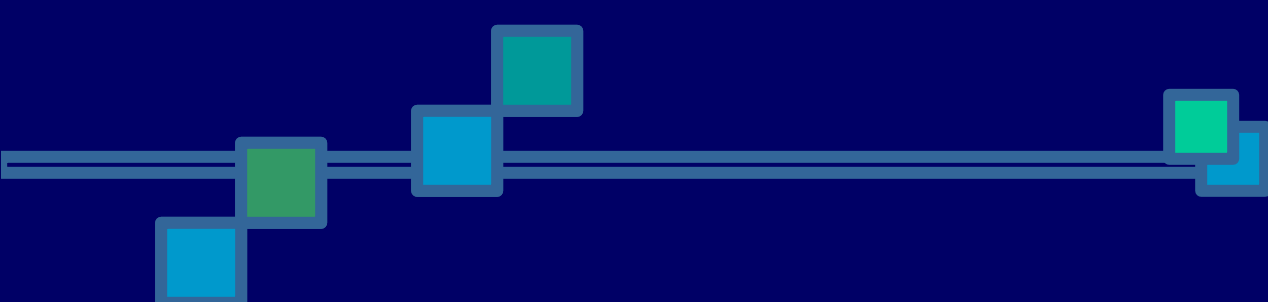

- To expose the undergraduate students to the working environment in Industry
 - It is expected that this exposure to the work environment would equip the student to make a better choice about his career after graduation
- 

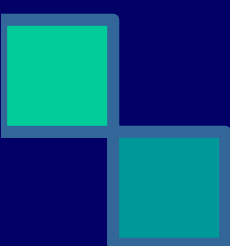

Overview

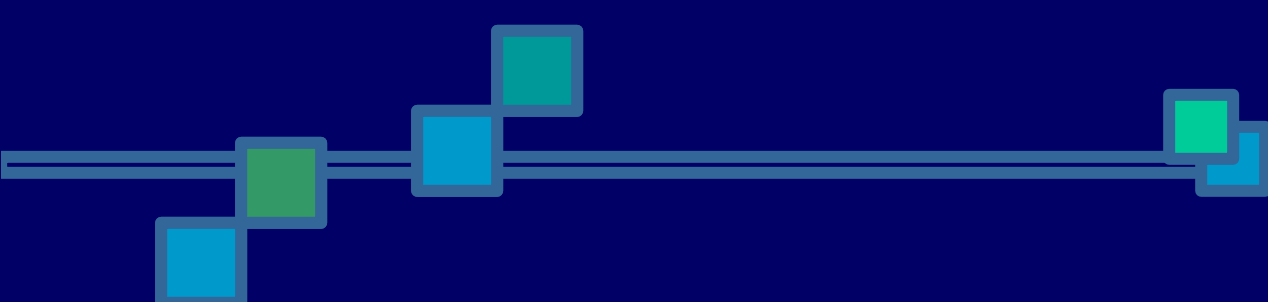

- The Industrial internship is a required part of the academic activity for the Second Year BTech students
 - This internship is expected to expose students to the industry culture, industry ways of doing things, how to carry out group activity, interpersonal dynamics and behavior, real life ICT situations having learnt various aspects of ICT in the class and the labs
- 

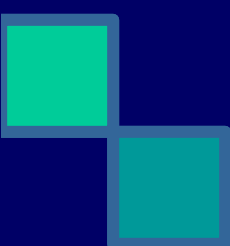

Duration

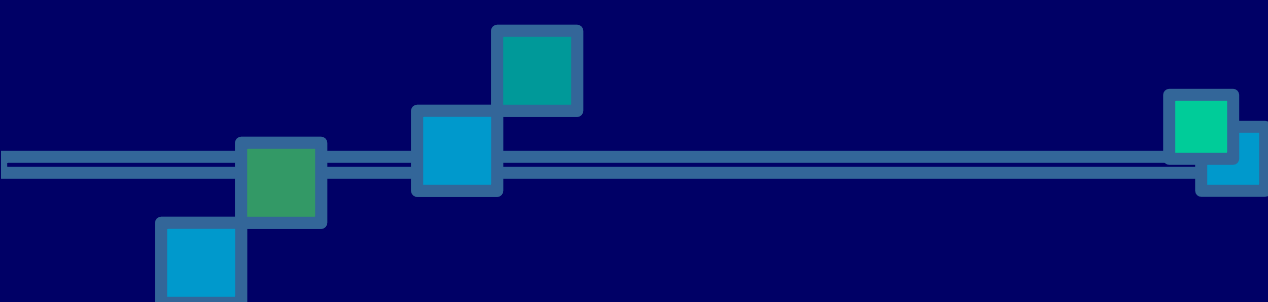

- The Industrial internship is of 6-8 weeks duration
 - The Industrial Internship each summer should end by 31st July
 - 2003 batch students can not register for summer courses in summer-2005 semester
 - It is preferable that the internship begins from 1st June after the completion of Re-examination
- 

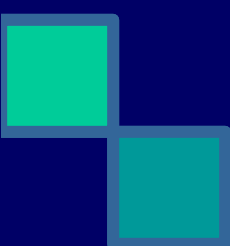

Important Entities and their Responsibilities

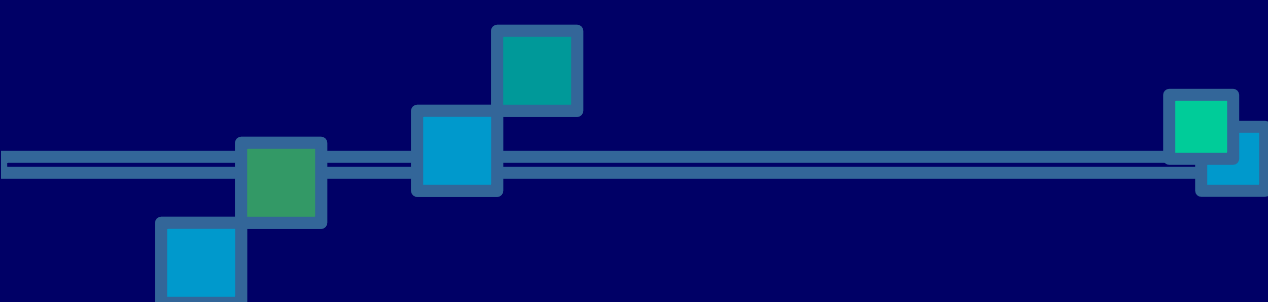

- **Student** – to undergo internship in the assigned industry
 - **CCE&IR** – to establish initial formal communication with industry to place students for internship and maintain internship related records
 - **On-site Supervisor** – To allocate work, supervise the internship and assist in the evaluation process
 - **Industry Internship Co-ordinator** – To formulate internship related documents, evaluate and grade the students
- 

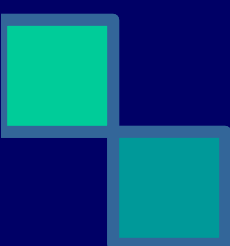

Requirements (1 of 2)

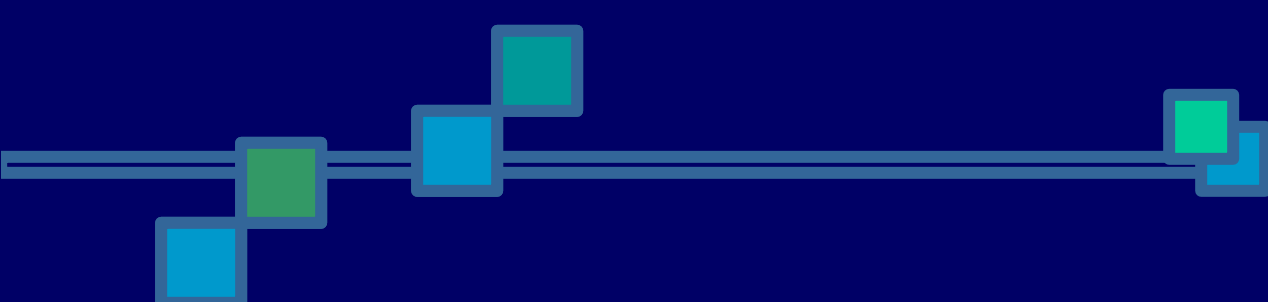

- An on-site supervisor is to be assigned who would look after the internship work of the students and interact (if required) with DA-IICT
 - The supervisor would allocate work to be carried out by the students
- 

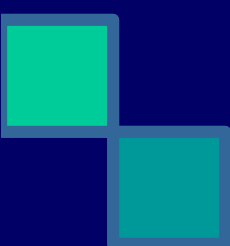

Requirements (2 of 2)

- The supervisor would assist in the evaluation of the students at the end of the Internship
 - Student is supposed to complete the work assigned to him and submit an “Industrial Internship Report” to the Industrial Internship Co-ordinator at DA-IICT
- 

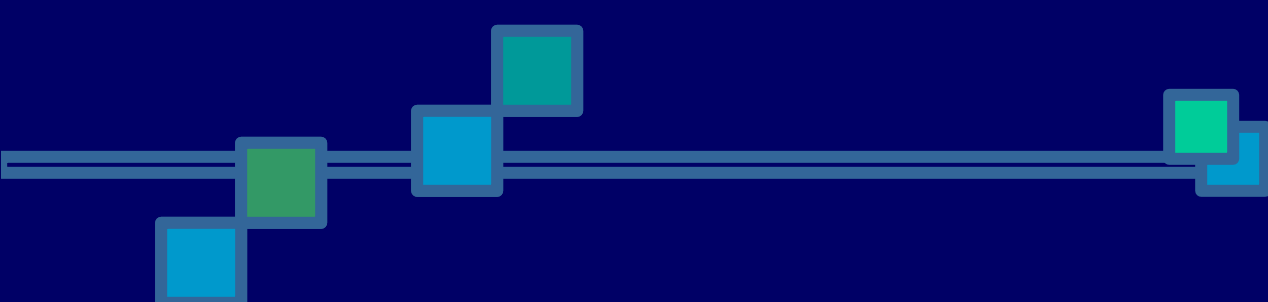

Expectations from Students (1 of 4)

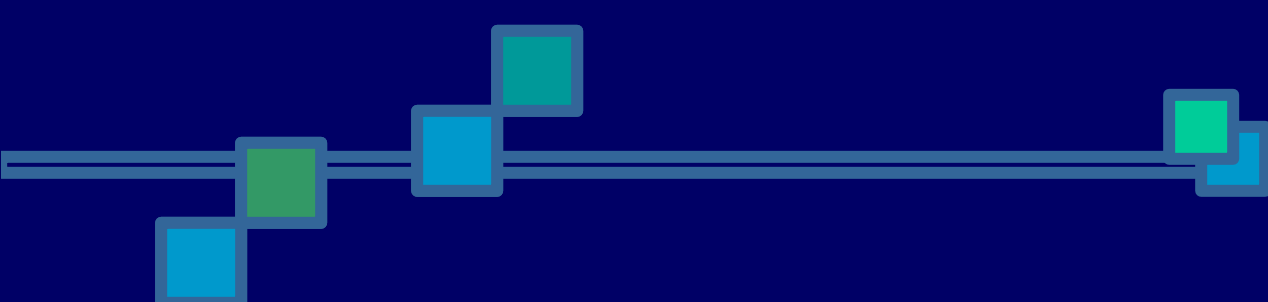

The student is expected to

- i. Study the industry unit in detail
 - ii. Analyze ICT related issues
 - iii. Learn how ICT is used in carrying out operation and how what is learnt in the classroom/ labs is related to how things work in industrial environment, etc.
- 

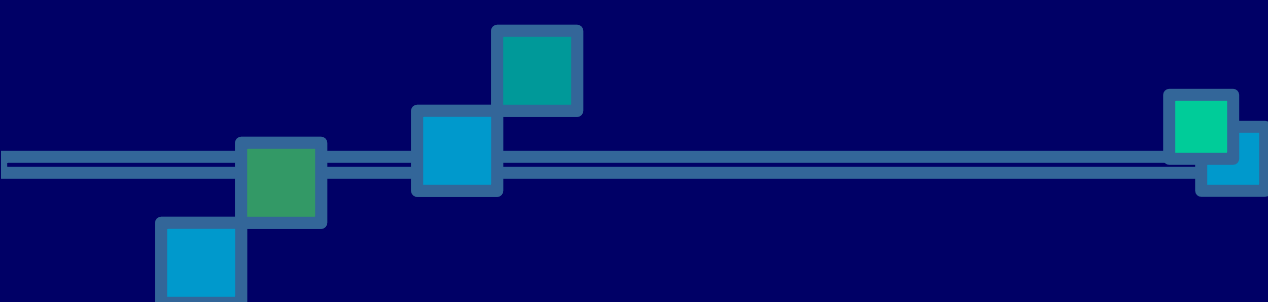

Expectations from Students (2 of 4)

- The student is expected to take care of his travel, stay and food expenses
 - The student is expected not to take any leave other than those announced by the organization and follow the timings of the organization
- 

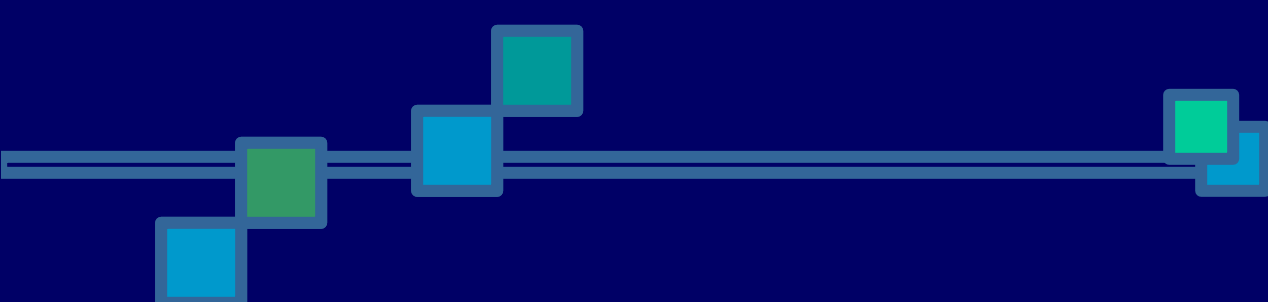

Expectations from Students (3 of 4)

- The student should report immediately to the supervisor in the event of exceptional circumstances like illness
 - Student is expected to follow the rules and regulations of the organization as briefed by the supervisor
- 

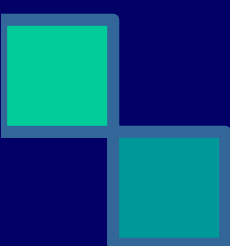

Expectations from Students (4 of 4)

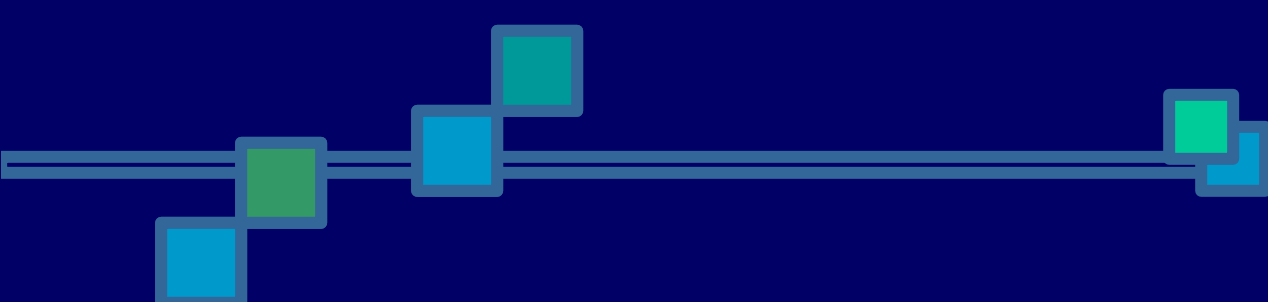

- Student is expected to complete the work assigned to him by the supervisor in the stipulated timeframe
 - Student is supposed to submit a short “Industrial Internship Report” in the prescribed format to the Industrial Internship Co-ordinator at DA-IICT by the announced date
- 

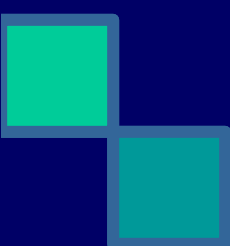

Evaluation

- Student is supposed to submit a short “Industrial Internship Report” in the prescribed format to the Industrial Internship Co-ordinator at DA-IICT
 - Industrial Internship Co-ordinator at DA-IICT to award a ‘Pass/Not Pass’ grade to each student after receiving feedback from the on-site supervisor
- 

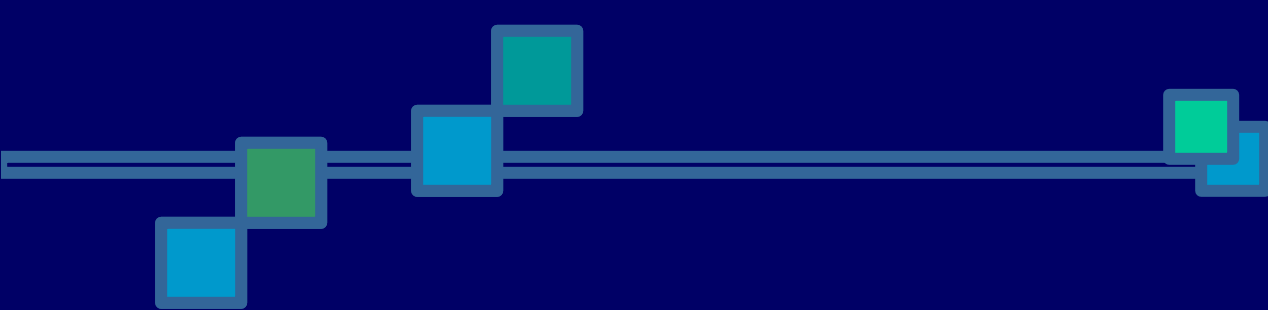

What Next?

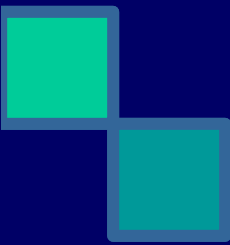

- 
- All students to fill a form and opt for locational preferences for the industrial internship. Entry to be made according to following details:

[From: Thu. 7th April, 05 from 5pm to 6pm,
Contact person: Kamlesh Parmar,
Place: Admin Block – Gnd floor, near receptionist]

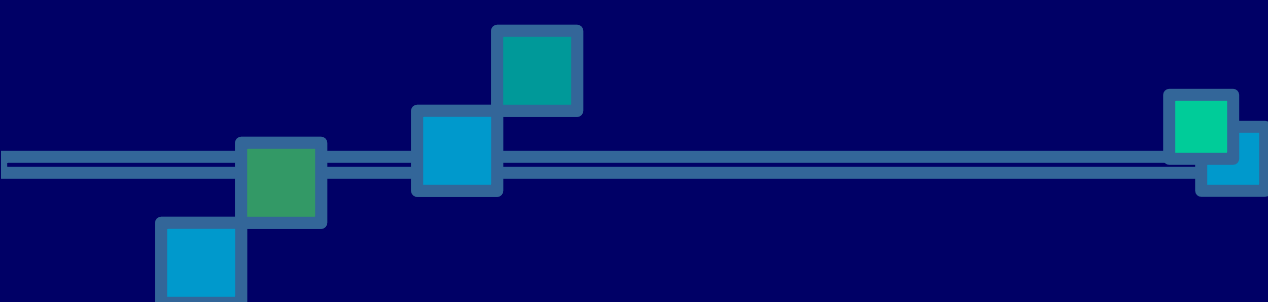

What Next?

- 
- Students have two Options:

Option 1 : Students to make their own
internship arrangements

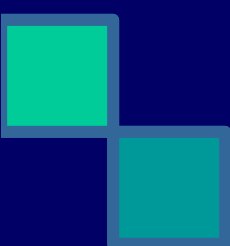

Option 2: Students to placed for
internship by CCE&IR

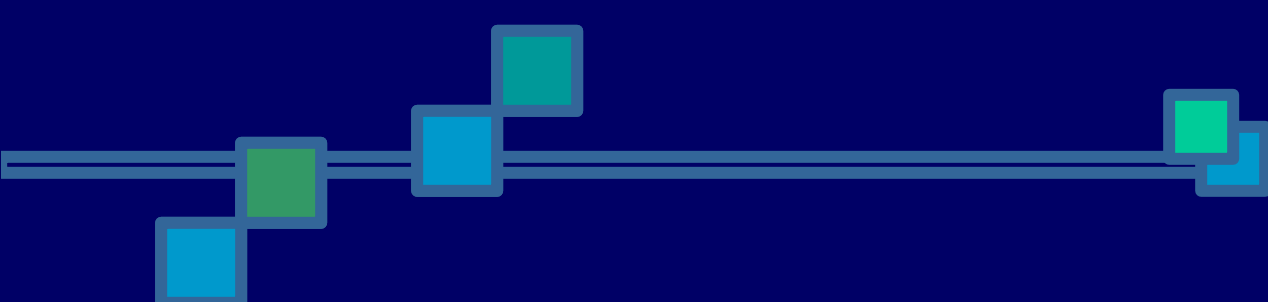

What Next? – Option 1

(1 of 2)

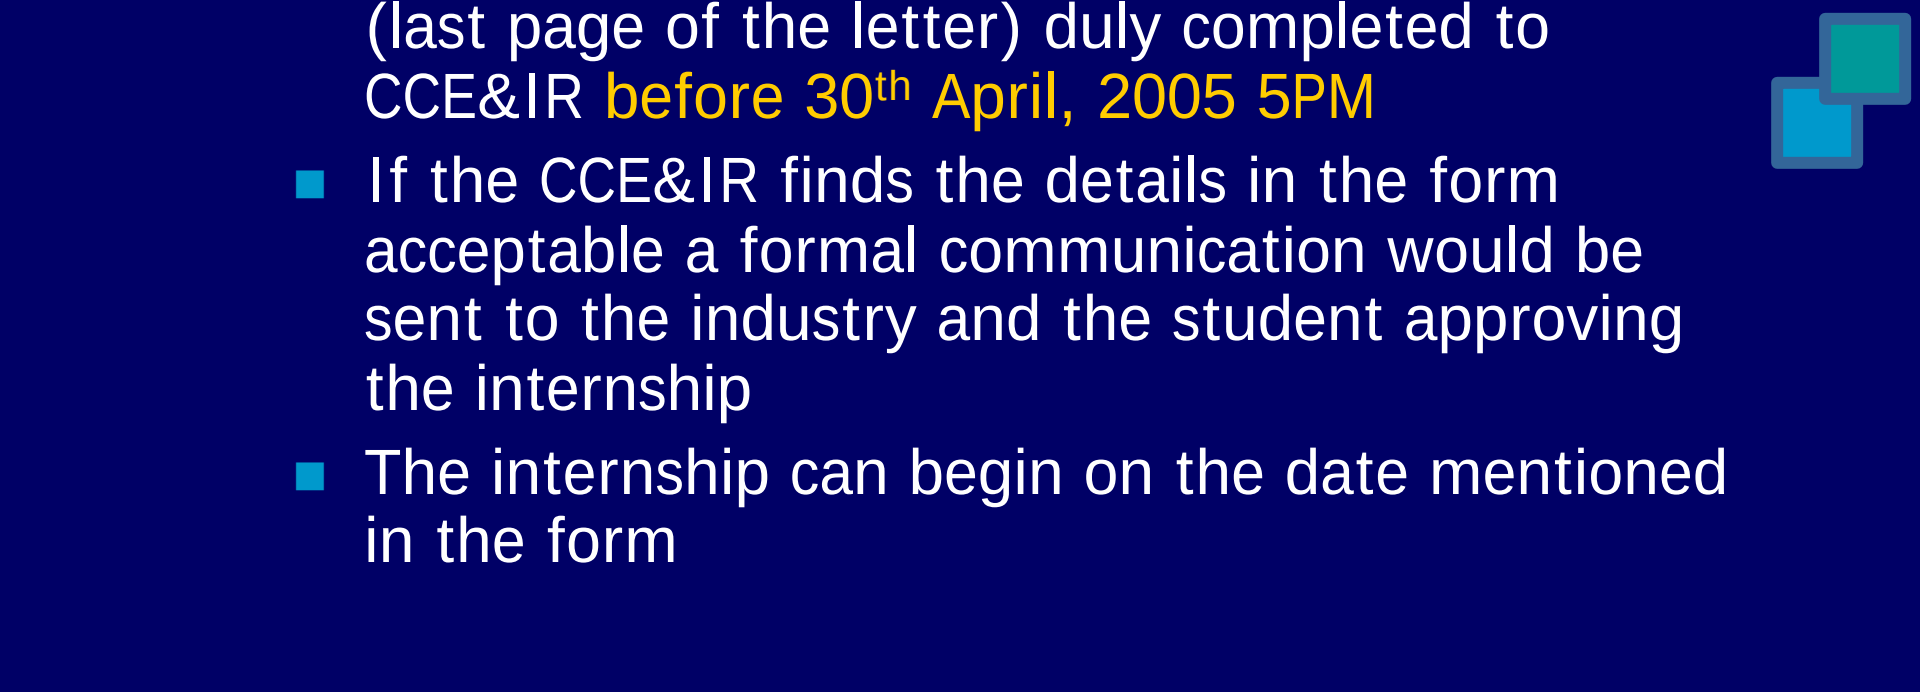

- 
- Students requested to initiate informal communication with industry (where some contact exists)
 - on getting a positive response students should initiate formal communication with the industry by sending a letter to be made available by CCE&IR
- 

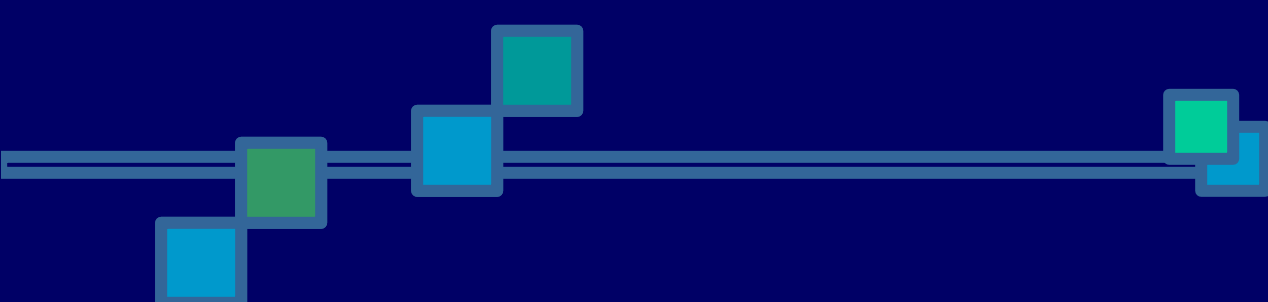

[From: Thu. 7th April, 05 from 5pm to 6pm,
Contact person: Kamlesh Parmar,
Place: Admin Block – Gnd floor, near receptionist]

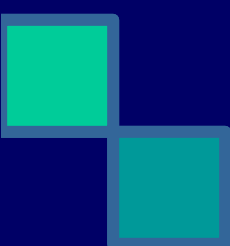

What Next? – Option 1

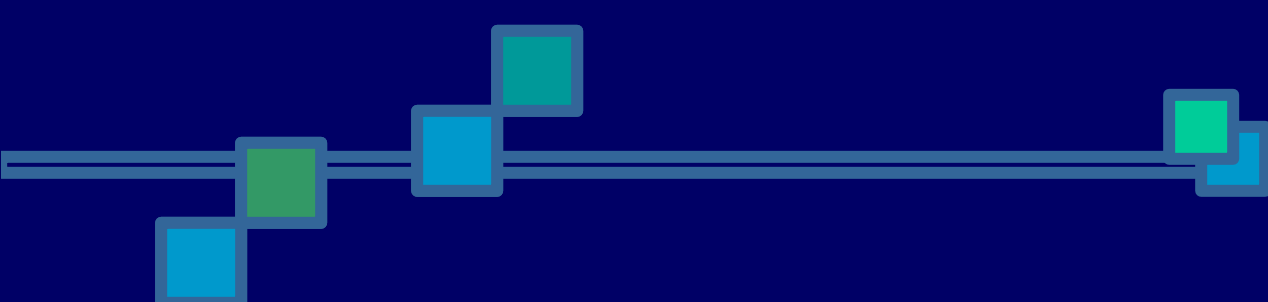

(2 of 2)

- Students getting a favorable response should submit the “Summer Industrial Internship Form” (last page of the letter) duly completed to CCE&IR **before 30th April, 2005 5PM**
 - If the CCE&IR finds the details in the form acceptable a formal communication would be sent to the industry and the student approving the internship
 - The internship can begin on the date mentioned in the form
- 

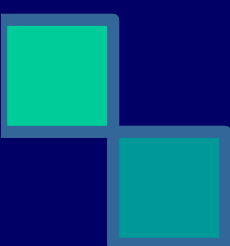

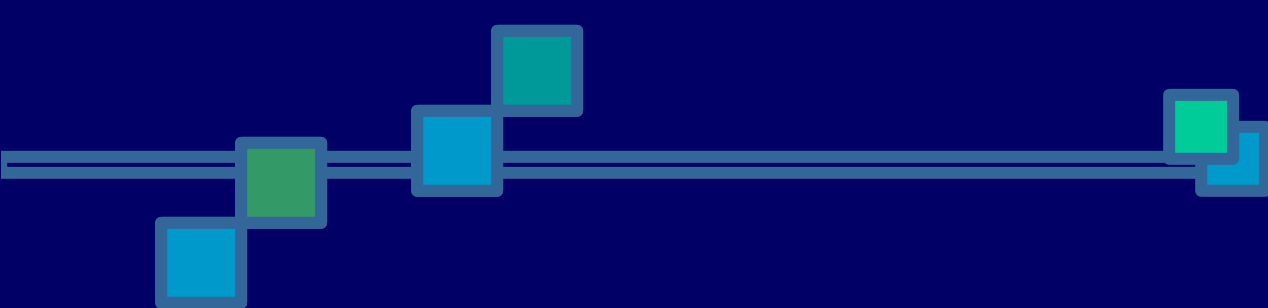

What Next? – Option 2

- 
- CCE&IR to contact organizations for accepting students for industrial internships
 - Based on the preferences CCE&IR to allocate students to industry opting for option 2
 - After 30th April, 2005 5PM, CCE&IR to allocate students those who opted for option 1 (but could not receive a positive reply from any industry) to available positions
- 

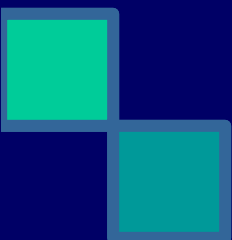

What Next?

- 
- Students not having details of the start of their industrial internship by 30th April, 2005:
 - Should submit their contact details to CCE&IR before proceeding on leave
 - Students are requested to regularly check emails for information related to internship placements
- 

Thank you
